

Productive jump form system for structures with core walls and shear walls.

The Space-Lift™ system is a fully-engineered jump form system intended for concrete shear wall applications. The system consists of frame components and a carriage assembly that supports the forming equipment and work crew.

The Space-Lift assembly is suspended from Jump shoes that are bolted to inserts in the concrete wall. The entire assembly remains anchored to the wall during the forming operation. Work platforms provide safe access during setting, placing, stripping and finishing activities. Rollback carriages allow the gang form to be retracted from the wall without being removed. All these activities, of course, proceed without using valuable crane time.

Highlights

- Standard Space-Lift frame heights of up to 16' for higher walls in lobby and atrium areas
- Space-Lift frame spacing up to 10' o.c. adapts to structure and gang form requirements
- The patented Lift Lock provides resistance to uplift forces resulting in a safer work environment.
- Rollback form access ranges from 35" with Steel-Ply to 29" with Aluminum Beam Gangs
- Trailing platform makes operations such as removing Jump Shoes, patching and welding easy and safe
- The unique Curved Wall Bracket provides angled adjustment for Space-Lift frames on tank applications with a minimum 11' radius.
- Work platform provides ample room for crews to set, strip and clean forms
- The patented Carriage Lock ensures the forms are locked in place during use and form cycling.

Give us a call at any of our branch locations, email us at info@formtechinc.com, or click on formtechinc.com/quote to get a quote. Our experienced Form Tech representatives will answer your questions, and help you get your project started with some of the best concrete forming, shoring, and accessory products in the industry, backed by a professional and detail-oriented staff.
