

The labor-saving benefits of modular forms with the strength of an all-steel design.

Panel design

Max-A-Form panels are constructed with a $\frac{3}{16}$ " steel face plate and heavy duty crossmembers to support higher pour rates. Panels up to 8' wide by 20' long are rated at 1500 psf; 9' and 10' wide panels are rated at 1200 psf and 12' wide panels are rated at 1000 psf. The rigidity of these panels virtually eliminates the need for waler or strongback requirements and reduces the number of ties required.

Panel sizes

Panels are available in more than 100 sizes, from 2' wide by 1' long to 10' wide by 20' long. The number of sizes provides more options when designing gangs, columns and pier caps. The large size means fewer pieces, fewer panel joints, fewer ties and less assembly labor.

Labor-saving

The Max-A-Form forming system is ideal for gang forming heavy structural walls and columns where repetition, multiple lifts and a smooth finish are required. The structurally welded frame and steel face also can support concrete loads over long spans without the need for shoring.

Give us a call at any of our branch locations, email us at info@formtechinc.com, or click on formtechinc.com/quote to get a quote. Our experienced Form Tech representatives will answer your questions, and help you get your project started with some of the best concrete forming, shoring, and accessory products in the industry, backed by a professional and detail-oriented staff.
